A versatile audit software

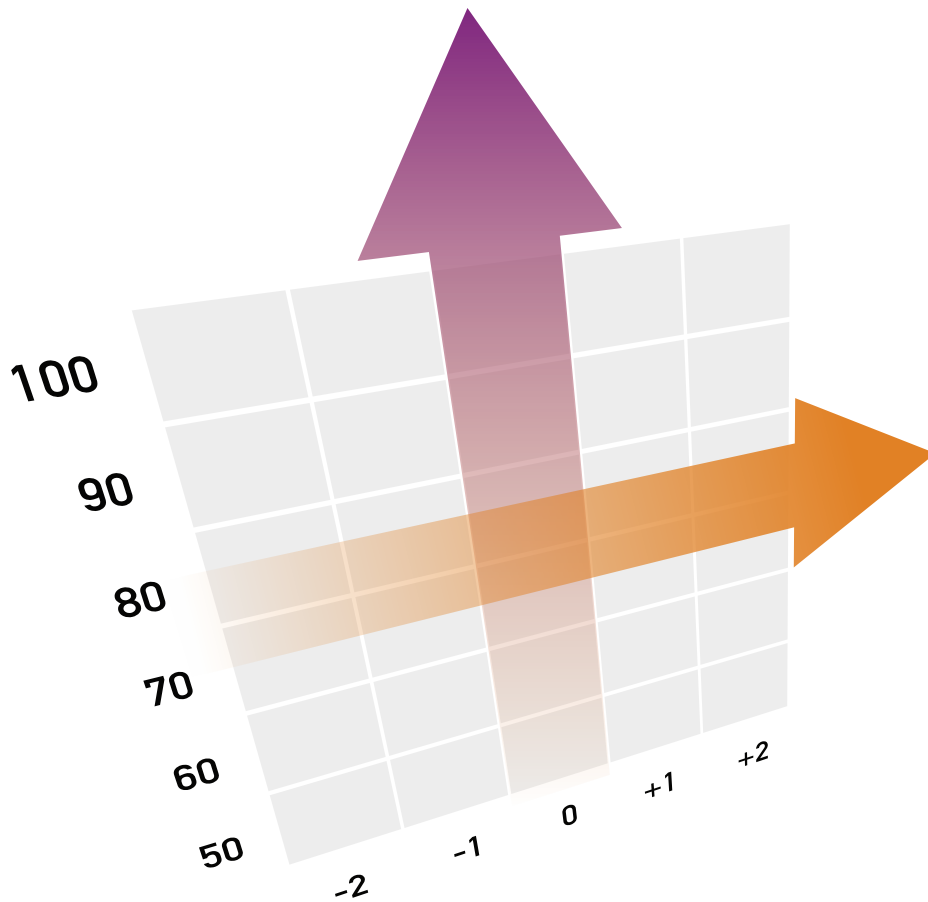

“SecuScore® audits initially allowed us to challenge our analysis and highlighted a series of discrepancies that had not yet been perceived, allowing us to validate our action plans and investments on a factual and measured basis.”

— Richard Le Vaillant, Metalor

A comprehensive audit model

Unlike one-dimensional checklists, SecuScore ranks your organization on two core dimensions, showing you what standards you are implementing, how well, and what to do to reach your goals.

Industry-agnostic >

SecuScore is template based, which means it can be used to audit virtually any field. Templates can be created or customized, and SecuScore will show you how you meet your own desired levels of standardization and how well you comply with industry-standard best practices and regulations.

< A better look at your position

SecuScore scores your organization on a progress and maturity axes. The violet progress axis shows you the level of standardization in your organization. The orange maturity axis tells you how good you really are at following each standard.

Simple workflow, clean reports

SecuScore will guide you through the audit step by step then issue all the reports you need to understand your current situation and take decisive action. It's an intuitive and error free way to audit.

Six steps to results

SecuScore has a robust, error-free workflow to plan, execute and report on your audit. Simply choose a template to start with, assign the auditors and let the system guide you through the rest.

Understand your data

Produce a one-time report, historical comparison report or multi-site comparison report. SecuScore will always tell you exactly what you need to know to make the right decision.

A 360° toolset for in-depth audit and analysis

From 10.000 feet view to microscopic detail, SecuScore gives you a powerful set of features to understand and compare your position in any level of detail.

Template based

SecuScore compares audit findings to the template of the audited field so you instantly understand your position.

Clear Reports

Save time and avoid constant confusion - SecuScore produces ready to present reports with an easier reading and understanding of the results.

Homogeneity

SecuScore guarantees audit homogeneity through template and workflow standardization, ensuring any future audit can be easily compared to the current one.

Comparison Reports

Track your progress by comparing the audit findings to a previous point in time, or compare different sites/locations you own.

Powerful Documenting

Evidence your findings by uploading files attached to your report. Any file format is supported and you can keep full traceability of every document linked to your audits.

A man in a white shirt and tie is pointing at a laptop screen. The image is overlaid with a large orange semi-transparent rectangle. The text is centered within this rectangle.

“Cash and valuables in transit are an increasingly complex industry and SecuScore allows us to stay on the cutting edge of security and quality of service required by our clients. We have increased our capacity to understand and control our operations significantly.”

— Didier Chaudat, TEMIS
